

Jacob Stack | Phoenix, AZ

623-692-0037 | jakestack91@gmail.com | [LinkedIn](#) | [My Portfolio](#) | [Tableau Dashboards](#)

Business Analyst with 5+ years of experience leveraging analytics to streamline business operations, and collaborating with cross-functional teams (engineering, marketing, customer relations, pre-sales, sales, and GTM) to achieve shared objectives.

Technical Skills:

Project Management Tools: Salesforce, HubSpot, Airtable, Jira, Notion, AI Tools (Claude, ChatGPT, MCP)

Programming: Python, SQL, R, Java, JavaScript

Analytics & BI: Tableau, Power BI, Looker, QuickSight, Alteryx, Metabase, Excel

Data Engineering: Snowflake, AWS (Redshift, S3), Big Query, Airflow, ETL/ELT, Docker

Experience:

Arizona State University | *Business Intelligence Analyst II*

Apr 2026 – Present

- **Owned** the intake, prioritization, and delivery of enterprise **ad hoc analytics requests**, gathering stakeholder requirements and translating ambiguous business questions into actionable insights that informed strategic and operational decisions.
- **Led** the end-to-end analysis of an **A/B marketing experiment**, validating source data, documenting analytical assumptions, and evaluating conversion, revenue, and incremental lift to deliver executive recommendations that optimized promotional strategy and improved decision quality.
- **Developed** a predictive classification model using **Python, R, and SQL** to identify at-risk learners, enabling earlier interventions and supporting proactive student success strategies through data-driven decision-making.

Paccurate | *Solutions Engineer, Data*

Sep 2024 – Aug 2025

- **Owned** the design and standardization of logistics analytics solutions, partnering with Product, Engineering, Sales, and Customer Success to translate customer requirements into scalable reporting and decision-support tools.
- **Led** the development of predictive logistics models and semantic reporting layers that enabled enterprise customers to evaluate packaging efficiency, reduce transportation costs, and make data-driven fulfillment decisions.
- **Built Transmutr**, a custom **ETL automation framework** that transformed, validated, and consolidated logistics datasets into standardized Excel reports, reducing manual data preparation and improving reporting consistency across customer implementations.

Amazon | *Business Analyst*

Feb 2022 – Sep 2024

- **Owned** executive reporting for warehouse and transportation operations, developing and maintaining **DBRs, MBRs, QBRs**, and operational dashboards that enabled leaders to monitor network performance, carrier metrics, and team KPIs.
- **Led** the development of scalable **AWS-based ELT pipelines** and **SQL** transformation frameworks that automated reporting workflows, reducing recurring report preparation time by **70%** while improving data reliability.
- **Developed** standardized KPI frameworks and automated validation processes that improved data quality, reporting consistency, and operational decision-making across large-scale logistics networks.

Public Consulting Group | *Data Analyst*

Feb 2021 – Feb 2022

- **Owned** financial reporting solutions supporting municipal budgeting, capital planning, and long-term financial forecasting for public sector agencies.
- **Led** the automation of financial reporting through advanced **Excel, VBA**, and forecasting models, reducing manual reporting effort by **50%** while improving reporting accuracy.
- **Developed** executive dashboards and analytical reporting that transformed operational and financial data into actionable insights supporting strategic planning, compliance, and executive decision-making.

Education & Certifications:

Bachelor of Science in Data Analytics - Southern New Hampshire University

June 2025

Master of Science in Computer Science - Southern New Hampshire University

Nov 2025 – Dec 2027

Certifications:

Tableau

Microsoft Power BI Data Analyst

Advanced SQL
